Tom Munson, Reclamation Specialist
Department of Natural Resources
Division of Oil, Gas and Mining
1594 West North Temple, Suite 1210
PO Box 145801
Salt Lake City, UT 84114-58801

Mine Permit Number S/037/0125

Dear Mr. Munson,

On July 24, 2013 the Division conducted a field inspection on the La Sal II Mine site, San Juan County, Utah. This report was received by mail at Laramide's Toronto office on September 11, 2013. The report noted that an invasive weed known as Russian knapweed was found in a small area immediately west of the topsoil stockpile. The field inspector requested that Laramide should attack and eradicate this invasive species while the infested area remained small.

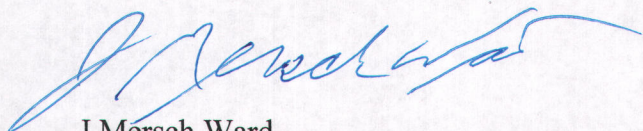

On September 30, 2013 Laramide inspected the site and on October 1, 2013 took the required steps to eradicate the plant species in and around the topsoil stock pile as requested by your department. A photo attached shows work in progress. Laramide will continue to monitor the site during the 2014 growing season and take any follow-up action that may be required to complete the eradication of this species from the referenced area.

This letter has been sent to your attention since you have been our past contact and due to the fact that the signatory to the inspection letter is not legible. Please provide copy distribution as you find appropriate.
